ANIMALS 01

THE QUESTION

Can an octopus hunt as a team with fish of different species?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 02

THE QUESTION

Do elephants use personal names just like we do?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 03

THE QUESTION

Do killer whales use kelp to fish for clams on the seabed?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 04

THE QUESTION

Do we know for certain why orcas rub themselves with kelp?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 02

THE ANSWER

We don't know yet.

Some vocal calls seem addressed to specific individual elephants. We don't yet know if they work exactly like human names in every way.

EXPLORE THE EVIDENCE SC-03

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 01

THE ANSWER

True.

Yes. Researchers observed mixed hunting parties searching for prey together, with different roles shared between octopus and fish.

EXPLORE THE EVIDENCE SC-01

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 04

THE ANSWER

We don't know yet.

No. Skin care, soothing parasites, and social bonding are interesting hypotheses, but the exact function remains under investigation.

EXPLORE THE EVIDENCE SC-04

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 03

THE ANSWER

False.

That is not what researchers documented. Some orcas roll pieces of kelp across their bodies as an allogrooming or social behavior.

EXPLORE THE EVIDENCE SC-04

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 05

THE QUESTION

Can humpback whales corral prey using rings of air bubbles?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 06

THE QUESTION

Did crows count all the way up to one hundred in the experiment?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 07

THE QUESTION

Can a sulphur-crested cockatoo learn to open a water fountain to drink?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 08

THE QUESTION

Do bumblebees rolling wooden balls feel joy exactly like humans do?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

ANIMALS 06

THE ANSWER

False.

No. The study analyzed crows producing a specific small number of vocal calls matching visual cues from 1 to 4.

EXPLORE THE EVIDENCE SC-06

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 05

THE ANSWER

True.

Yes. Solitary and group humpbacks blow circular bubble nets that concentrate fish and krill before lunging upward.

EXPLORE THE EVIDENCE SC-05

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 08

THE ANSWER

We don't know yet.

The rolling behavior meets scientific criteria for animal play. We do not know what their internal subjective experience feels like.

EXPLORE THE EVIDENCE SC-16

Find this code in the scientific source library.

OTTO / The Curiosity Cards

ANIMALS 07

THE ANSWER

True.

Yes! In Sydney, wild cockatoos learned to grip and push fountain handles with their feet and body weight to drink running water.

EXPLORE THE EVIDENCE SC-02

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 09

THE QUESTION

Do stressed plants emit sounds that human ears cannot hear?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 10

THE QUESTION

Does a fern with fifty times more DNA than humans make it more intelligent?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 11

THE QUESTION

Do plants emit ultrasound sounds with the intentional purpose of chatting?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 12

THE QUESTION

Have seeds ever sprouted in authentic samples of lunar regolith?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 10

THE ANSWER

False.

No. Genome size does not determine an organism's intelligence or complexity. Much of a giant genome consists of repetitive sequences.

EXPLORE THE EVIDENCE SC-13

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 09

THE ANSWER

True.

Yes. When dehydrated or cut, tomato and tobacco plants emit ultrasonic popping sounds detectable by specialized microphones.

EXPLORE THE EVIDENCE SC-09

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 12

THE ANSWER

True.

Yes, in a lab on Earth using Apollo soil samples. However, the plants showed severe stress responses compared to earthly volcanic ash.

EXPLORE THE EVIDENCE SC-12

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 11

THE ANSWER

We don't know yet.

Acoustic emissions have been measured. Whether they serve as intentional communication signals remains unproven.

EXPLORE THE EVIDENCE SC-09

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 13

THE QUESTION

Are there carnivorous plants with pitcher traps buried completely underground?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 14

THE QUESTION

Do all plant and moss spores survive any condition in outer space indefinitely?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

EXPERIMENTS 15

THE QUESTION

Can a goldfish navigate and steer a motorized tank on wheels on dry land?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

EXPERIMENTS 16

THE QUESTION

Did the goldfish steer the land vehicle using a tiny steering wheel inside the water?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

PLANTS 14

THE ANSWER

False.

No. Survival depends strictly on the organism, solar UV exposure, temperature extremes, and duration in space.

EXPLORE THE EVIDENCE SC-11

Find this code in the scientific source library.

OTTO / The Curiosity Cards

PLANTS 13

THE ANSWER

True.

Yes! Nepenthes pudica in Borneo develops underground pitcher traps that capture ants, mites, and subterranean invertebrates.

EXPLORE THE EVIDENCE SC-14

Find this code in the scientific source library.

OTTO / The Curiosity Cards

EXPERIMENTS 16

THE ANSWER

False.

No! There was no steering wheel. An overhead camera and computer tracked where the fish faced and moved the wheels accordingly.

EXPLORE THE EVIDENCE SC-15

Find this code in the scientific source library.

OTTO / The Curiosity Cards

EXPERIMENTS 15

THE ANSWER

True.

Yes. A specialized robotic vehicle tracked the fish's swimming position and translated it into motor commands, allowing it to navigate a room.

EXPLORE THE EVIDENCE SC-15

Find this code in the scientific source library.

OTTO / The Curiosity Cards

EXPERIMENTS 17

THE QUESTION

Did bumblebees roll wooden balls even when offered no sugary food reward?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

EXPERIMENTS 18

THE QUESTION

Do scientists know exactly what every cat thinks when looking at a tight slot?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

EXPERIMENTS 19

THE QUESTION

Is making a smooth cacio e pepe pasta sauce purely a matter of good luck?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

DINOSAURS 20

THE QUESTION

Can we clone a living T. rex today from mosquito blood trapped in amber?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

EXPERIMENTS 18

THE ANSWER

We don't know yet.

No. Experiments measure hesitation and body posture, but science cannot directly read an animal's subjective thoughts.

EXPLORE THE EVIDENCE SC-19

Find this code in the scientific source library.

OTTO / The Curiosity Cards

EXPERIMENTS 17

THE ANSWER

True.

Yes. Bees rolled balls repeatedly without food incentives, showing that the behavior was intrinsically motivating.

EXPLORE THE EVIDENCE SC-16

Find this code in the scientific source library.

OTTO / The Curiosity Cards

DINOSAURS 20

THE ANSWER

False.

No. DNA decays over millions of years. We do not have intact T. rex DNA; Jurassic Park remains science fiction.

EXPLORE THE EVIDENCE SC-23

Find this code in the scientific source library.

OTTO / The Curiosity Cards

EXPERIMENTS 19

THE ANSWER

False.

No. It is applied physics and chemistry! Water temperature, starch concentration, and shear mixing determine emulsion stability.

EXPLORE THE EVIDENCE SC-20

Find this code in the scientific source library.

OTTO / The Curiosity Cards

DINOSAURS 21

THE QUESTION

Are modern birds living theropod dinosaurs that survived extinction?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

DINOSAURS 22

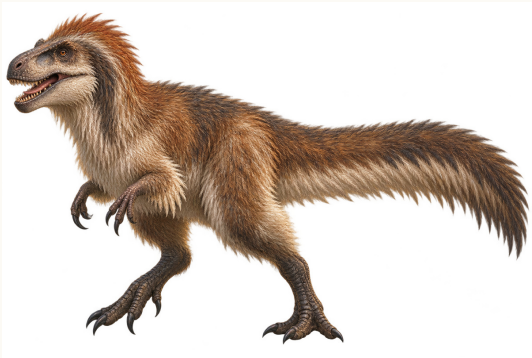

THE QUESTION

Is the domestic chicken the direct granddaughter descended from T. rex?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

DINOSAURS 23

THE QUESTION

Do paleontologists know with complete certainty why the very first feathers evolved?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

DINOSAURS 24

THE QUESTION

Will we definitely see a living bird identical in every way to the extinct dodo?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

DINOSAURS 22

THE ANSWER

False.

No. Chickens and T. rex share distant common theropod ancestors, but T. rex is an extinct cousin, not a direct ancestor.

EXPLORE THE EVIDENCE SC-22

Find this code in the scientific source library.

OTTO / The Curiosity Cards

DINOSAURS 21

THE ANSWER

True.

Yes! Biologically and anatomically, birds are avian dinosaurs belonging to the theropod lineage.

EXPLORE THE EVIDENCE SC-22

Find this code in the scientific source library.

OTTO / The Curiosity Cards

DINOSAURS 24

THE ANSWER

We don't know yet.

Gene editing can alter pigeon genomes to express dodo traits, but whether that recreates the lost species remains an open debate.

EXPLORE THE EVIDENCE SC-26

Find this code in the scientific source library.

OTTO / The Curiosity Cards

DINOSAURS 23

THE ANSWER

We don't know yet.

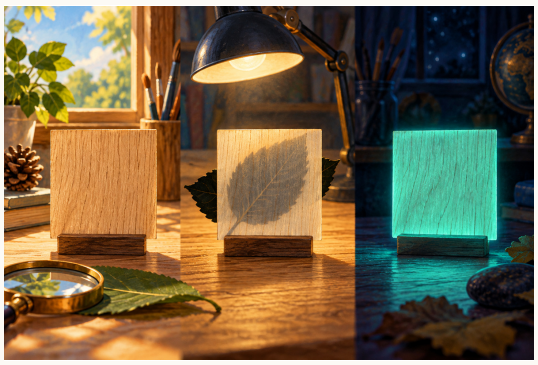

Thermal insulation, mating displays, and sensory functions are leading hypotheses. Feathers existed long before flight evolved.

EXPLORE THE EVIDENCE SC-21

Find this code in the scientific source library.

OTTO / The Curiosity Cards

INVENTIONS 25

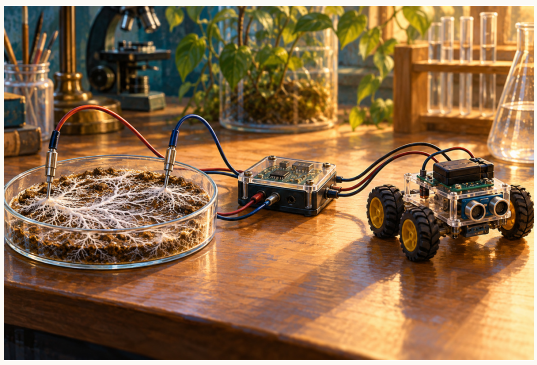

THE QUESTION

Will all residential house windows be made of transparent wood in the future?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

INVENTIONS 26

THE QUESTION

Does fungal mycelium control a bio-robot because it possesses a conscious brain?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

INVENTIONS 27

THE QUESTION

Do certain plant seeds twist and drill themselves into soil using only humidity?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

INVENTIONS 28

THE QUESTION

Will an elephant trunk always be the best design blueprint for every future robot?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

INVENTIONS 26

THE ANSWER

False.

No. Electrodes capture natural bioelectrical signals from fungal threads, and human-engineered circuits convert them into motor commands.

EXPLORE THE EVIDENCE SC-36

Find this code in the scientific source library.

OTTO / The Curiosity Cards

INVENTIONS 25

THE ANSWER

We don't know yet.

Transparent wood is currently developed in labs. Large-scale industrial production, durability, and cost will determine future adoption.

EXPLORE THE EVIDENCE SC-32

Find this code in the scientific source library.

OTTO / The Curiosity Cards

INVENTIONS 28

THE ANSWER

We don't know yet.

It depends on the task. Bio-inspired soft robotics is powerful for grasping delicate objects, but rigid arms are faster for heavy factory work.

EXPLORE THE EVIDENCE SC-34

Find this code in the scientific source library.

OTTO / The Curiosity Cards

INVENTIONS 27

THE ANSWER

True.

Yes. Erodium seed awns bend and twist hygroscopically when air humidity changes, driving the seed into the ground without a motor.

EXPLORE THE EVIDENCE SC-39

Find this code in the scientific source library.

OTTO / The Curiosity Cards

BODY 29

THE QUESTION

Are there experimental prosthetic limbs directly driven by biological body signals?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

BODY 30

THE QUESTION

Can an experimental retinal implant restore 20/20 perfect vision to any blind person?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

BODY 31

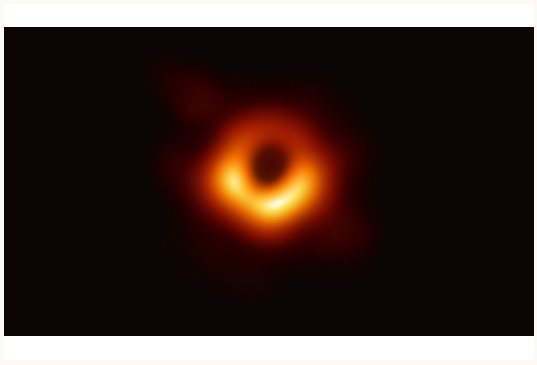

THE QUESTION

Will brain-computer speech implants soon help every person who cannot speak?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

SPACE 32

EHT Collaboration / ESO · CC BY 4.0

THE QUESTION

Was the image of supermassive black hole M87* created by combining radio telescopes worldwide?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

BODY 30

THE ANSWER

False.

No. Retinal implants are designed for specific degenerations and provide artificial light patterns, not restored normal eyesight.

EXPLORE THE EVIDENCE SC-44

Find this code in the scientific source library.

OTTO / The Curiosity Cards

BODY 29

THE ANSWER

True.

Yes. Neuroprosthetic interfaces record muscular and neural signals to provide intuitive, natural prosthetic joint movement.

EXPLORE THE EVIDENCE SC-43

Find this code in the scientific source library.

OTTO / The Curiosity Cards

SPACE 32

THE ANSWER

True.

Yes. The Event Horizon Telescope combined synchronized radio data from observatories around the globe using supercomputers.

EXPLORE THE EVIDENCE SC-55

Find this code in the scientific source library.

OTTO / The Curiosity Cards

BODY 31

THE ANSWER

We don't know yet.

Clinical trials decoding brain activity into synthesized speech are highly promising, but broader clinical availability requires more years of testing.

EXPLORE THE EVIDENCE SC-46

Find this code in the scientific source library.

OTTO / The Curiosity Cards

SPACE 33

EHT Collaboration / ESO · CC BY 4.0

THE QUESTION

Was the first photo of a black hole taken with an ordinary digital camera in space?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

SPACE 34

THE QUESTION

Do astronomers know exactly how many interstellar comets will enter our solar system next decade?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

SPACE 35

THE QUESTION

Will comet 3I/ATLAS stay forever in a closed elliptical orbit around our Sun?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

SPACE 36

THE QUESTION

Will a large populated city definitely exist on the surface of Mars by 2040?

TRUE / FALSE / WE DON'T KNOW YET

Choose, then flip the card. OTTO

SPACE 34

THE ANSWER

We don't know yet.

No. Interstellar objects come from other star systems unpredictably. Future discoveries depend on new survey sky telescopes like Vera Rubin.

EXPLORE THE EVIDENCE SC-52

Find this code in the scientific source library.

OTTO / The Curiosity Cards

SPACE 33

THE ANSWER

False.

No. It is an interferometric reconstruction built from petabytes of radio wave data collected across Earth, not a conventional photo snapshot.

EXPLORE THE EVIDENCE SC-55

Find this code in the scientific source library.

OTTO / The Curiosity Cards

SPACE 36

THE ANSWER

We don't know yet.

Long-duration life support, radiation shielding, energy, and transportation must first be tested and proven. No certain date exists.

EXPLORE THE EVIDENCE SC-54

Find this code in the scientific source library.

OTTO / The Curiosity Cards

SPACE 35

THE ANSWER

False.

No. 3I/ATLAS has an open, hyperbolic trajectory with high speed: it passes through the solar system once and flies back into interstellar space.

EXPLORE THE EVIDENCE SC-52

Find this code in the scientific source library.

OTTO / The Curiosity Cards
